

Says

What have we heard them say?
What can we imagine them saying?

Thinks

What are their wants, needs, hopes, and dreams?
What other thoughts might influence their behavior?

health hub medical

Type your heading...

Short summary of the persona

a digital health hub has evolved since 2012 when we established a telephone-based remote follow-up and virtual clinic service

We use clinical-evidence, smart solutions and devices to hear you better

The electronic medical record system not only allows for better, personalised healthcare

uniting employees and customers to support our patients.

This is a collection of stories from children with disabilities around the globe

Patient related factors such as socio-demographic variables

Healthcare professionals provide services differently because factors vary, such as experience, individual abilities and personalities

This centre offers a full complement of multidisciplinary services for our patient:

goal is to have clinical staff and patients experience the benefits and value of a new patient engagement solution

The sudden reversal of role from HCW to a patient might lead to frustration, helplessness, adjustment issues, stigma, fear of discrimination

Anxiety is a psychological, physiological, and behavioral state induced in animals and humans

Emotion has a substantial influence on the cognitive processes in humans, including perception, attention, learning,

Does

What behavior have we observed?
What can we imagine them doing?

Feels

What are their fears, frustrations, and anxieties?
What other feelings might influence their behavior?
